

Homeowner Fencing

Developer fencing has been constructed throughout the neighborhood of Heartland. Fencing becomes the responsibility of the homeowner as the fences are always built on private property. The homeowner must properly maintain, repair, rebuild and otherwise keep the fence in good condition and where rebuilding is required, the fence must be built exactly the same as the original fence.

Homeowners located on interior lots (i.e. NOT backing onto park, green space or environmental reserve) are allowed to use wood screen fence or chain link fence on their lots. Homeowners who choose to build chain link fencing are allowed to build a 1.2 or 1.8 black powder coated chain link fence on the rear and/or sideyards of their property. No chain link will be allowed on a sideyard where it abuts a street or where there is existing developer wood screen fence. If a homeowner chooses to build a wood screen fence on the sideyards of their property, the fence must be built with a minimum of 4 x 4 posts and be 1.8 meters in height, the stain color is a custom mixed base and can be bought at Cloverdale Paint under "Cochrane Fence". This color is a natural tone Cetol. The code is as follow: -25, CX11Y6, F-13, KX-3Y48. Please see fence details below.

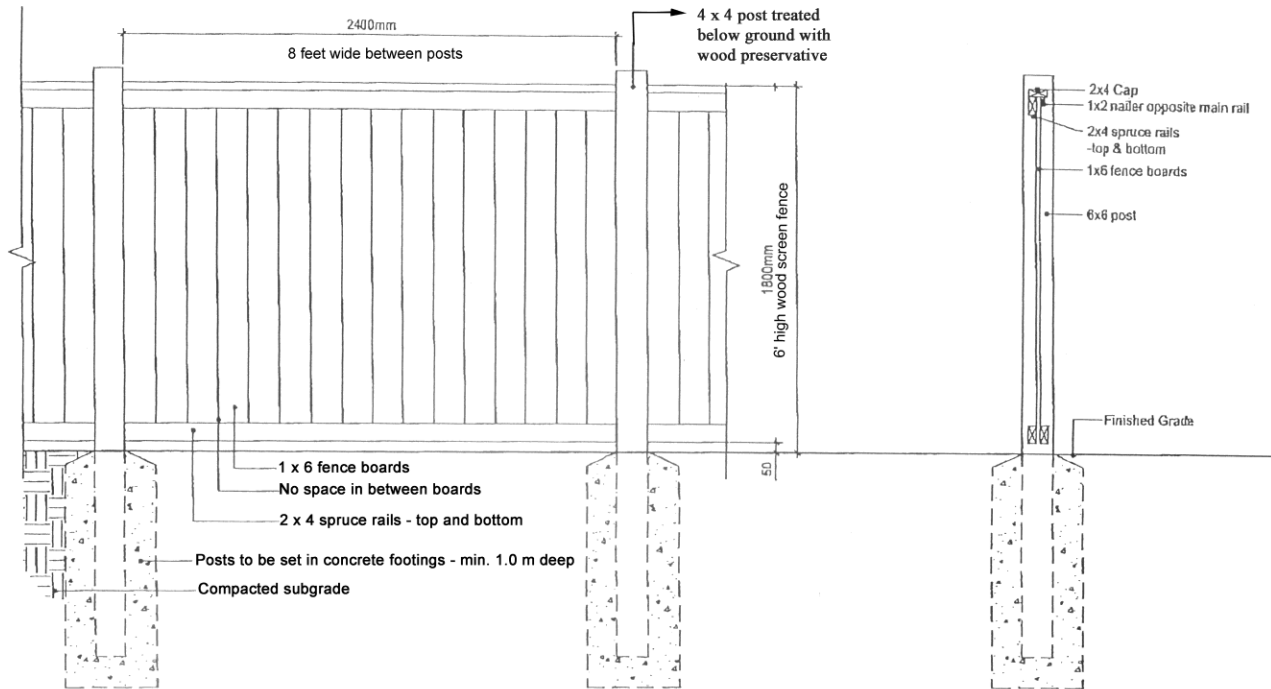

Homeowners that are considered high visibility (i.e. backing onto parks, stormponds, green spaces, and environmental reserves) are encouraged to erect a 1.2 black powder coated chain link fence on the sideyards of their property. If privacy is required on a high visibility lot, a 1.8 meter high wood screen fence can be constructed on a portion of the lot, a minimum of 5 meters (15 feet) of chain link must be constructed from the rear property line so as not to obstruct neighbor's views.

Fences cannot be located on City property or on any Utility Rights-of-Way.

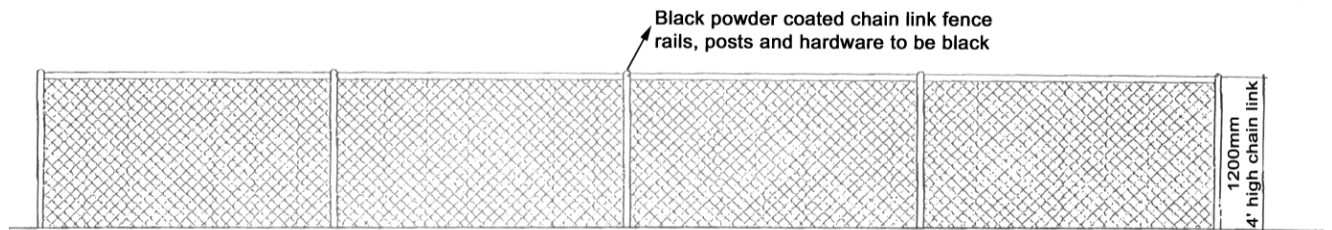

Fences on residential property are the responsibility of the homeowner. If the fence is located within your property boundaries, you are responsible. Any cost for construction and/or maintenance of the fence is a private issue between neighbors.

Before you dig your fence posts! Reduce the risk of personal injury and property damage by contacting Alberta One-Call at 1-800-242-3447 to request to have the location of your utilities marked.

Wood Screen Fencing Details

Chain Link Fencing Details

Please Note: All fencing in Heartland is to be coordinated in both design and color and must be constructed according to the details. All wood screen fencing is to be stained with 2 coats of the custom based mix from Cloverdale Paint under “Cochrane Fence”.
